

DWA_03.4 Knowledge Check_DWA3.1

1. Please show how you applied a Markdown File to a piece of your code.

- To apply a Markdown file to a piece of your code, you can use a code block syntax from markdown. You can use backticks (`) to encapsulate any part in responses that's longer-format content. Markdown is a syntax—or, set of rules—that formats text on web pages. Traditionally, to format text on web pages, people used Hypertext Markup Language.

```
<ul>
  <li>Item 1</li>
  <li>Item 2</li>
  <li>Item 3</li>
</ul>
```

2. Please show how you applied JSDoc Comments to a piece of your code.

- JSDoc comments are used to document your code. They help you and other developers understand what your code does, how it works, and what it expects as input

```
Function add(num1, num2) {
  Return num1 + num2 ;
}
```

3. Please show how you applied the @ts-check annotation to a piece of your code.

- To apply the @ts-check annotation to a piece of your code, you can add it to the top of your JavaScript file. This will enable type checking in your JavaScript file.

- ```
Function add(a, b) {
 Return a + b;
}

console.log (add(1,2));
```

---

4. As a BONUS,

- Good documentation practices is when documents affecting product quality or compliance with regulations are created, maintained, and reviewed according to certain standards. These standards may include using clear and error-free language, tracking the authorship and date of documents, providing explanations for blank spaces, and following consistent formats<sup>1</sup>
-
